

SIMPLE DIY INSTALLATION

COMPATIBLE WITH MOST TYPES OF STANDARD FAUCET
Standard mounting adapters are provided inside the product packaging box.

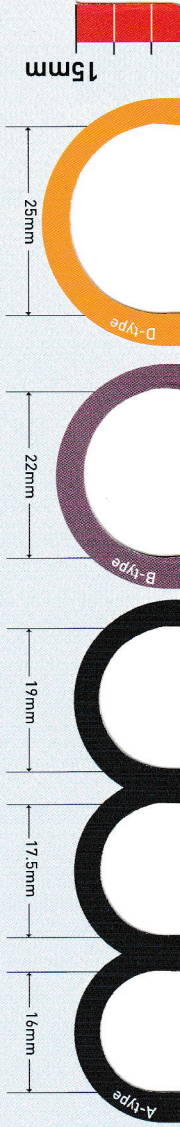

- Mounting Adapter
- Mounting Nut

Ensure a compatible faucet adapter is used. Non-standard adapter is available only upon request and subjected to availability.

Use the Dimension Guide below to check whether your faucet fits

⚠ Incompatible Faucet Type

- ⊗ Vertical portion of spout less than 15mm in length
- ⊗ Screw threads more or less than 22mm in width OTHER THAN 22MM
- ⊗ Shower nozzle/ pull down sprayer
- ⊗ Spout diameter less than 13mm or more than 25mm
- ⊗ Non-standard spout head Square Oval
- ⊗ Spouts with sensors

NOTE

- If water leaks from the faucet attachment, the unit or faucet spout may be damaged or not fitted correctly/snugly.
- Change the filter if the purified water flow rate decreases dramatically due to premature filter clogging.
- Water may leak from the faucet attachment if the bottom of the spout is covered with a plastic insulation cap. Excessive load or pressure exerted may also damage the cap.
- DO NOT connect the unit to instantaneous water heater.
