

# H<sub>2</sub>O Easy

Keep clean, refreshing drinking water ready throughout the day with this countertop water filtration system. The dispenser features a spigot and two push-button controls. Just add tap water, the carbon filter in the water tank removes impurities and reduces chlorine taste and odour.

Now you can have hot and filtered water all at the same time with our H2O Easy HOT. And here's the clever bit, at the push of a button you can choose to dispense filtered warm water or if you are feeling particularly craving for hot cup of beverage.

With the H2O Easy COLD, you can enjoy crisp cold filtered water on its own, mix with lime or lemon wedge, or add to flavoured drink mixes for instant lemonade, or other favourites on a hot day.

## REPLACEMENT FILTER CARTRIDGE for H<sub>2</sub>O Easy & Junior

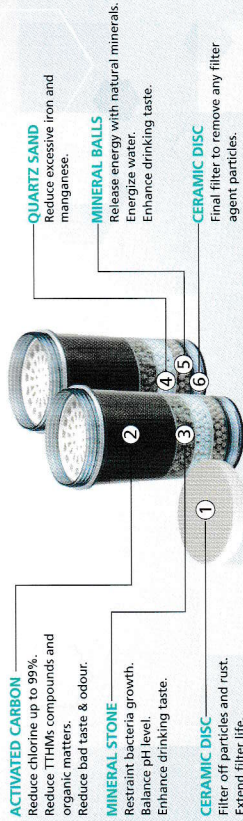

H2O Easy and Junior uses a common filter. Each filter is certified for 150 litres of use or 2 months. You can set the monthly calendar on the H2O Easy and H2O Junior cover to remind you of your next change.

## REPLACEMENT FILTER CARTRIDGE for H<sub>2</sub>O<sup>+</sup>

The ever-popular Multi-Stage Filter Cartridge for the H2O Plus has a unique filtration process that is designed to filter your drinking water.

Through the multi-stage process, the filters reduce chlorine and remove impurities in the water to a very high degree. The filters also reduce bad taste and odour.

For best results, it is recommended that the filters be changed every 2650 litres or every 3 months, whichever comes first.
